

VALUE

Functional solutions for easy living.

The VALUE series provides a pleasant and safe environment for people who need extra help with their daily routines in the bathroom, while also assisting helpers and carers.

- All the products are made of materials which are robust and resistant to cleaning agents as well as to moisture and high humidity levels.
- The design of the products takes account of current ergonomic and hygiene requirements while ensuring high standards of user comfort.
- The designs are thoroughly tested and solid, and will withstand many years of daily use.

Respect and the right of the individual to a good life in spite of disability forms the cornerstone of the Pressalit philosophy, as summarised by the following words:

keep living

Wash basin brackets, wash basins and tap

The height-adjustable wash brackets are suitable for many situations, e.g. nursing homes and schools. The numerous adjustment options encourage users to help themselves as well as improving working conditions for helpers and carers.

The shape and size of the wash basin ensures that both seated and standing users can use the tap and get close to the jet of water.

The tap on the wash basin must be easy, comfortable and logical to use – regardless of whether you are sitting or standing.

The wash basin has a raised edge, preventing water from running over the back of the wash basin.

The wash basin is relatively flat, making it possible for a wheelchair user to manoeuvre right undet it and get comfortably close to the

Ergonomic wash basin

R2052 R2053 MATRIX New Curve wash basin with overflow MATRIX New Curve wash basin without overflow

Materials: Crushed marble with a high-gloss, non-porous sanitation coating

The concave front edge stabilises standing as well as seated users. The wash basin slopes down to the front, offering ergonomically correct support for the elbows.

For seated users, the flat bottom of the wash basin allows room for the user's legs underneath the wash basin.

Tap hole: Ø 36 mm.

For placement of plumbing installations, see page 15.

Ergonomic wash basin

R2050 R2051 MATRIX Curve wash basin with overflow MATRIX Curve wash basin without overflow

Materials: Ceramics

The concave front edge stabilises standing as well as seated users. The rounded edges are also comfortable to hold and rest against.

For seated users, the design of the corners leaves space and supports the elbows in the basin, while the flat bottom allows room for the user's legs underneath the wash basin.

Tap hole: Ø 35 mm.

For placement of plumbing installations, see page 15.

Height-adjustable wash basin bracket - gas

R1210000 Height-adjustable, 320 mm

Gas lift height adjustment is suitable when the height needs to be changed frequently for different users. For easy daily adjustment by carers.

Height-adjustable wash basin bracket - manual

R1214000

Height-adjustable, 150 mm

Manual height adjustment is suitable when the height of the wash basin only needs adjusting once in a while. For adjustment by maintenance worker.

Wash basin tap

RT622

Tap with long rotatable spout

The ring-shaped operating lever is suitable for disabled users. The long rotatable spout makes it easier for seated users to reach the water as the spout can always be pushed to one side if it is in the way.

The symbols for hot and cold water are visible to both seated and standing users. Scald protection prevents unintended water temperatures above 40°C.

Integrated water-saving function for high and low flow rates.

The lever is spring-loaded, which prevents splashing and using excessive water unintentionally.

VA-approved (Denmark).

Support arms

The different types of support arms ensure a greater sense of security for both the independent user and the carer.

The support arms are manufactured with a Rilsan*-coated surface which is comfortable to hold, easy to clean and protects against rust.

The support arms are supplied as fixed or height-adjustable models, and can be folded away when not in use.

Materials: Rilsan®-coated steel, pressure-cast aluminium, plastic

With toilet seat R37 Without toilet seat

Can be mounted easily and quickly on the toilet.
The padded handles are comfortable for hands and arms.
The support arms can be folded individually.
Supplied with hinges BL1999.

Only recommended for use with the following toilet seats: R26, R27, R28, R29, R30, R36, R37 or R38.

The support arms are suitable for people who need to be supported slightly when using the toilet. For people transferring from a wheelchair to the toilet, wall-mounted support arms are recommended.

Support arm, height-adjustable

R1110000 Height-adjustable, 150 mm

Length: 850 mm

Projection when folded: 200 mm

Toilet seats

People are built differently. Sizes and shapes vary - bottoms included. Toilet seats from Pressalit Care take these differences into account. Therefore, we also supply raised and slanted models.

All toilet seat models match most toilets.

Pressalit Care's ergonomic seats are both functional and attractively designed.

They are made of high-quality thermoset plastic which makes them extremely durable and easy to clean.

The solid stainless steel hinges ensure a sense of security and stability.

To further increase stability, we recommend mounting Dania and Colani with institutional hinges with crossbar BV2999/BV3999, e.g. for sideways transfers from wheelchairs.

Stabilising buffers ensure that the seat sits very securely on the toilet bowl, even with sideways pressure. The stabilising buffers can be adjusted to be in contact with the inside or outside of the bowl, depending on its shape.

Hard-wearing and easy-to-clean

Materials: Max. load: Thermoset plastic, stainless steel Seats: 250 kg Raised seats: 150 kg

Dania

R27xxx R37xxx R28000 R38000 without cover, with hinges with cover, with hinges without cover, open front, with hinges with cover, open front, with hinges

O00: White

012: Anthracite gray 108: Dark blue

035: Red

An anatomically well-designed seat which is suitable for most people. Sideways transfer is easy as the seat is relatively flat. The cover is comfortable to sit on, and when raised provides good back support.

Dania is also available in a version with an open front, which makes it suitable for using as a bidet with easy access for a hand

Supplied with universal hinge B82/B83 as standard. Can also be supplied with institutional hinges D92.

Ergosit

R29000 R30000

without cover, with hinges with cover and hinges

Large, wide sitting surface with good support. Especially well-suited for "large" adults with digestive problems.

The bowels are stimulated by the seat's contoured surface that presses and acts on the thigh muscles and nerves. Grooves at the back prevent the user's bottom from sticking to the seat.

Supplied with institutional hinges D92 as standard.

Also available with anti-theft and vandal-proof hinges BZ7.

Colani

R26000

without cover, with hinges with cover and hinges

The curved bowl shape supports and stabilises the pelvic region and also makes the seat well-suited for children (aged 6+ years) with muscular atrophy.

The raised side edges are easy to hold when the body needs to be stabilised. The cover is comfortable to sit on, and when raised provides good back support.

Supplied with universal hinge B82/B83 as standard. Also available with institutional hinges D92 or anti-theft and vandal-proof BZ7 hinges.

Supplied with special hinges.

Dania 50/100 mm is supplied with a splash guard T9515.

Toilets

The height and the shape of the toilet have a key bearing on whether the user sits securely on the toilet.

A standard height toilet can be difficult to sit down on and get up from for many people. A high toilet could be an alternative choice, or a wall-hung toilet that can be installed at a height to suit the user.

R2099000 R2091000

Toilet, 700 mm Toilet, 540 mm

A 700 mm wall-hung toilet is recommended for wheelchair users. An extra long bowl also allows more space for the carer.

Toilet, floor model

R2097000

Toilet, high model, S-trap

Material: Porcelain

A wall-hung toilet makes it possible to mount the toilet at whichever height is required.

A wall-hung toilet also allows space for a wheelchair's foot supports, the legs of a mobile hoist and the carer's feet, as well as facilitating cleaning of the floor.

Bowl height without toilet seat: 460 mm

Supplied with dual flush, pre-set to 3/6 litres Can be re-set to 2/4 litres.

Folding shower seats

For some users, being able to sit while showering is a matter of safety. These shower seats are designed for installation in the shower area and can be easily folded up or down according to need.

The seats and backs can easily be removed for cleaning.

The folding shower seat is designed so that the water runs off it.

The wall bracket and leg are made of Rilsan*-coated stainless steel for extra strength.

The Rilsan*-coated steel effectively protects against rust, is pleasant to hold and is easy to clean.

Handrails

Once the rosettes have been mounted, the rosette covers click into place, concealing the screws.

handrails can be combined and assembled to suit the individual user. The handrails are made from solid colour ABS plastic tubing so scratches and ordinary wear cannot be seen.

Pressalit Care's ABS plastic handrail system provides a secure handhold in any situation and can be used in both the bathroom and other places where support is required. The

The handrails are 32 mm in diameter so they can be held comfortably and firmly.

Keeping a distance of 52 mm away from the wall, the handrail is easy to firmly grab and hold.

Handrail assembly

The tubular handrail sections and fittings must be glued together with ABS adhesive.

Pressalit Care recommends Cyanolit (Pressalit Care no. T4654).

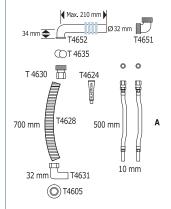

Dimensioned drawings

Mounting and accessories

Flexible feed and waste systems

Height-adjustable wash basin brackets require flexible feed and waste systems. It is important that the plumbing installations are correctly positioned. Detailed mounting instructions are obviously supplied with the individual products but can also be requested separately, for example for planning purposes.

Flexible feed/waste system

R2061 3/8"/500 mm

Feed and waste pipes are VA-approved (Denmark).

R2071 1/2"/500 mm (primarily UK)

Feed/waste pipes can be supplied in other lengths. The recommended installation height takes wheelchair foot supports into account.

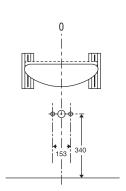

R2061: A = T4604 R2071: A = T4610

Flexible feed and waste systems can be supplemented with water traps R2076 and air relief kit R2059.

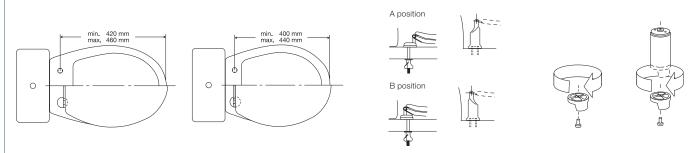

Pressalit Care recommends that feed and waste wall connections.

tions are at 90° angles, pointing downwards.

PRESSALIT® Care

Reduced functionality need not limit a person's development. For more than 35 years, the keep living philosophy has been a guiding principle for Pressalit Care's development of flexible kitchen and bathroom solutions for people with disabilities.

Thanks to its research-based knowledge, Pressalit Care is marketleading within specialist kitchen and bathroom solutions and today provides consultancy to customers worldwide.

An underlying respect for the individual and his or her possibilities is also reflected in the company's relationship to society at large and the local community. At Pressalit, Corporate Social Responsibility (CSR) is deeply rooted in the company's strategy and values and provides an important lodestar for all parts of the organisation.
